**Subject:** Ex. 6 - Personal Privacy RE: Dimock

Ms. Taylor:

When you talk to the litigants, make sure that you ask them for their lab results. They have never produced lab results that show chemical contamination. Also, ask them why they did not participate in Dr. Robert Puls EPA hydrofracking study. I did participate. Their lawyer wouldn't let them because he knows that the EPA will not find any chemical contaminants. Why are these people wasting your time when the EPA was in Dimock last Tuesday ? You are being played like a drum. BEWARE.

You are still invited to my home to see my treatment system.

Ms. Taylor:

I hear that you will be in Dimock next week. I am one of the 18 in the Consent Order. I have never taken my well off line and I have a treatment shed that produces outstanding quality water. Please contact me if you would like to see it.

Regards,
